The President of the Senate thereupon appointed Senator Larson, Senator Anderson (Pondera), and Representatives MacDonald, Beck and Chaffin, to so inform the Governor.

His Excellency, Governor J. Hugo Aronson then appeared and was escorted to the Chief Clerk's desk. After having been presented to the assembly by the President of the Senate, he delivered the following address: Mr. President, Mr. Speaker, and Members of the 34th Legislative Assembly:

My theme song two years ago when I had the great privilege of delivering my first message was:

WHAT IS BEST FOR MONTANA.

I further stated that:

WE CAN AND MUST SUBSTITUTE BUSINESS FOR POLITICS.

In outlining the job ahead, there was this three-fold objective:

First, we must make the appropriations and provide the legislative machinery to keep the wheels of government in operation for the next two years:

Second, we must correct any evils which may exist; and

Third, we must build for the future.

Let me repeat a statement made at that time: "As we set out to accomplish our objectives we must stamp out any spirit of vindictiveness. Our examination of what has happened should be with a view of gathering from the experience of yesterday something constructive for tomorrow, as well as the months and years ahead."

Certainly we must respect and face the facts and again make a decision similar to the one you Legislators made two years ago when you did make appropriations so that Montana was able to live within its income.

I HAVE EVERY CONFIDENCE THAT YOU WILL BALANCE THE BUDGET. IT CAN AND MUST BE DONE.

In building for the future, we must correct evils which exist.

GOOD GOVERNMENT, IN ORDER TO SURVIVE, HAS TO BE AN HONEST GOVERNMENT.

There must not be inequalities in taxation or in the distribution of taxes.

Some of you, as well as a lot of people in Montana, are going to be shocked and surprised when I make the statement that practically every Montanan who pays personal or property taxes doesn't truthfully report the actual value as required by law. The reason we do not truthfully report actual values is because of custom, because we do not wish to pay more than the other fellow, or because we do not have a schedule on other property like we do on automobiles.

Let me further state that there are not only inequalities within counties, but there are glaring inequalities as between counties. If our laws are wrong they should be repealed and workable ones substituted; but as long as these laws remain on the statute books, it is the duty of the Governor, the Board of Equalization, County Assessors, County Commissioners, and other public officials, to enforce them. To my notion, THE BOARD OF

EQUALIZATION, WITHIN THE LAST TWO YEARS, HAS DONE A JOB OF CLOSING LOOPHOLES WHICH HAS NEVER BEEN EQUALED. The Board and its staff has compiled facts and figures which I think should be brought to the attention of not only the regular committees, but to each and every Senator and Representative.

If I may do so Mr. President, and Mr. Speaker, I respectfully request that your honorable bodies either hold another joint session within the next day or so at which time the Board of Equalization might present its complete story or in such manner as your bodies determine. This will give you an opportunity to dig into this problem in order that the misunderstandings, misconceptions and propaganda might be corrected.

From what I have heard these last few days, I know that many of you are ready and willing to reject this proposal although you do not have all of the facts. It is my firm belief that many of you will take a different view as these facts come to life.

For instance, a good index is the ratio of gas tax refunds, 2.77% or \$2,358,219, in 1954 to farm machinery assessments of \$85,058,470. There is no reason why the ratio should be 1.6% in Chouteau county and 23% in Deer Lodge county.

Neither should the ratio between sales and assessments of city and town lots and improvements in 29 counties average 27%. Rural property in the same 29 counties averages 28%.

The variation between counties ranges from 18% to 38% for city and town lots and 8.4% to 44% for rural property in these 29 counties.

DOES ANYONE THINK the value of non-irrigated, tillable land has dropped from \$13.00 per acre in 1929 to \$8.37 in 1954? Would you think the value of this type of land in Rosebud county increased 38%, while in Wheatland county it decreased 71%.

OR DO YOU SUPPOSE grazing land values dropped from \$4.58 in 1929 to \$2.66 an acre in 1954. During that period, Stillwater county grazing land increased in value 9%, while that in Wibaux county decreased 70%.

WOULD YOU THINK the value of household furniture and equipment averages less than \$85 per person in Montana? Would the people of Liberty county have an average of \$205 per person while in Silver Bow county it is less than \$22 per person?

WHY do the assessment rolls list only 77% of the cattle shown in the census for 1954, and only 74% of the sheep? Golden Valley county's ratio is 83% of the cattle and Carbon county's 85% of the sheep, while Richland county is lowest in percentage with 70% of the cattle and 51% of the sheep.

HOW can we allocate school and welfare funds equitably if the assessments vary in such proportions as I have listed, and these are but a few examples.

One thing is certain. YOUR GOVERNOR AND THE BOARD OF EQUALIZATION DO NOT FAVOR INCREASED PROPERTY TAXATION. Any student of Montana legislative action knows that when the income tax legislation was adopted, the purpose was to shift the tax burden from property.

Despite the fact that appropriation requests, NOW more than \$68,000,000, likely will reach \$70,000,000 when the appropriations should not exceed \$45,000,000, it is my opinion that by sound thinking and hard work, we can come out of this legislative session with a sensible program and a balanced budget.

The State of Montana has not levied for state purposes the two-mill levy for many years, and I HOPE that it never will.

Then, too, in my opinion, the State of Montana should provide from state funds sufficient revenues equivalent to the present six-mill levy for the University units and the mill and one-half levy which will be required to meet the obligations for the new bond issues at Warm Springs and Boulder. We, in Montana, are getting into a position where we are robbing Peter to pay Paul. We are shifting a state responsibility back on the property tax, and at the same time making a state function of a local responsibility. It is my firm conviction that this legislature is at the crossroads with regard to school finances.

My recommendation for your consideration is that the state accept as its obligation the University responsibility and return to the counties and school districts the major responsibility for elementary and secondary education.

I could hardly believe it when the State Controller's report indicated that the requests for general fund appropriations to the State Public School Equalization fund for 1955/1956 and 1956/1957 totaled \$16,500,000, and that the request for University units totaled \$19,000,000 for this same period. Other requests for education appropriations totaled more than \$820,000, which would bring the total requests for state appropriations for education to an amount in excess of \$36,000,000, of the total of \$68,500,000.

This \$16,500,000 for the State Public School Equalization fund does not include the schools' 25% of the income tax and corporation license tax, as well as the state's portion of the U. S. oil and gas royalties, the three of which combined are estimated to be in excess of \$2,000,000 annually; nor does it include the receipts from the school lands which probably will exceed \$4,500,000 per year. For the biennium, the total would be \$13,000,000. These together with the \$16,500,000 which is requested from the general fund total \$29,500,000. There is no doubt that with wise and sensible management of our public lands and with an expanding economy, the state income to the schools can be increased, but it does seem to me that the shifting of responsibility of school management and school financing from a local to a state level is not sound.

After all, the fundamental foundation of our American way of life rests on the home, the church, and the school. It is my opinion that increasing state aid is just providing the door opener for the next step—federal aid. I believe in improving schools and education opportunities but I think the heritage that we must leave the coming generations must be one based on common sense. That is why it seems imperative that this legislative assembly starts work immediately on the problem of honest and equitable taxation as well as honest and equitable distribution of the tax dollars.

At this point, I state for the record that I AM OPPOSED TO A SALES TAX which has been suggested as a means of increasing revenue. You legislators can trim budgets and appropriation requests where they should be trimmed, and you can provide adequately where the need is evident; but as you examine the requests, I think you will agree with me that this upsurge of demands for education gives cause for close examination.

In our efforts to provide for honest and equitable taxation and tax dollar distribution WE WANT NO SPECIAL PRIVILEGE for any individual, group or corporation. Neither do we want to impose unfair penalties and practices. Our job is to balance the scales. To me it is most regrettable that hobbles have been placed on development of state lands in the Williston Basin and the older Montana oil fields. The recent decision of our Montana Supreme Court not only clouds the issue in Montana, but also puts a question mark on leases of state lands in North and South Dakota, the other states in the Williston Basin. Their laws, similar to the Montana statute declared unconstitutional were enacted under the same provisions of the amended congressional enabling act.

Certainly there is grave doubt as to the validity of making oil and gas leases on state lands under present conditions. I am advised an appeal to

the United States Supreme Court is contemplated by interested parties, particularly since the Montana Supreme Court took several months before reaching a split decision.

The inability to offer leases comparable to those granted by the federal government, all of the oil producing states and private land owners, has resulted in the loss during 1953 and 1954 of millions of dollars to our school funds.

Much of this income would have been due to speculation. But the speculative inducement has been lost now by reason of abandonment of large tracts due to dry holes and discouraging geophysical developments. Let us hope there shortly will be a definite and final decision to settle the matter. The schools need additional revenue, but Montana needs development now and in the future. It will take millions before the real producing fields are outlined in the Williston Basin but real dividends already are evident.

Another great disappointment was the Supreme Court's decision invalidating the legislation setting up a non-partisan Montana Legislative Research Council. Less than a month ago I attended several sessions of the Council of State Governments, of which I am a member of the Board of Managers. At this meeting were representatives from all states, the great majority of whom were legislators. Certainly there must be some means devised where research can be carried on which will provide information for constructive deliberations.

Then, too, Montana should not be a charity member of the Council of State Governments. It should be a full-fledged member and adequate appropriations should be provided for this purpose. The Montana assessment of less than \$2,500 annually, a small sum when it is realized that this makes available the benefit of priceless research on all problems. For instance, the subjects discussed at the December meeting were Highways, Tax and Fiscal Policy, Education, Mental Health, Problems of the Aging, and Water Policy.

Industry and the federal government certainly recognize the importance of adequate research. States must keep pace.

Tax equalization, property classification, highway financing, education, elimination of duplication, governmental reorganization—these are but a few of the problems. It doesn't make sense that a legislator, one who recognizes his responsibility to his state and his home county, should be barred from participation in this important study.

HOW ELSE can we substitute business for politics?

Neither should the Governor's appropriations be so pinched that we cannot participate in a research and analysis program.

An example of what research can do will be demonstrated within a short time when you have an opportunity to hear the report of the State Board of Forestry, the Forest Advisory Commission, and your State Forester. These individuals have made a sensible approach to the problem of protecting a resource, which by their analysis has been found to have a value of \$60,000,000, practically four times what it had previously been valued.

The program of conservation and management is sound and sensible, and I am sure you will give it the consideration it deserves.

In my message two years ago I stated that "our water, our minerals, our timber, our magnetic scenery"—these are the assets we must conserve wisely and develop soundly. Coupled with their development we must ever seek to expand our processing, manufacturing, trade and tourist facilities. Nor, should we overlook the vital importance of good relations with our neighbors in adjacent Canada and the states. We can be thankful that the two great national parks, Glacier and Yellowstone, are of such great benefit to our economy. Every effort should be made to expand and advertise

our tourist attractions to induce more tourists to visit Montana and to stay longer.

"Water is our greatest heritage. Through legislation and by decrees of courts, water rights are established and determined by priority of use. We must be diligent and protect our rights, so that there is available to coming generations sufficient water for all possible development for irrigation of our lands and for domestic and industrial purposes. We should plan wisely and should cooperate with the other states of the Missouri and Columbia river basins toward sound programs safeguarding Montana's right to all water that may be required for the future development of the state."

In the past two years the Columbia River Compact Commission has worked hard to try and find an equitable solution to put into a compact. They have discussed it with the various states as well as federal departments, and undoubtedly the Montana members will have a proposal for our sincere consideration. In addition to the work of the Compact Commission, the Governor, the Water Board and the State Engineer, have worked diligently to keep pace with the developments of both the Columbia basin and the Missouri Basin Inter-Agency Committee, the Pacific Northwest Power Policy Committee, and the Missouri Basin States Governors' Committee. We are endeavoring to insure our rights to use the Waterton and Belly rivers for potential irrigation of a large area in northern Montana. We are working to get the Libby dam project started and are urging early action for the Yellowtail and Moorhead dams in eastern Montana.

Consideration should be given to the suggestion that an underground water code be adopted. We must never relax our efforts to encourage and promote higher standards for our rural residents nor should we diminish the splendid work of the Montana Water Conservation Board in the past twenty years.

The recommendations of the Fish and Game Commission, particularly to minimize the menace to the state's farm economy where expanding numbers of game have been a real source of trouble and damage, whether the non-resident hunting license should be liberalized and the proposed changes of the Montana game laws as recommended by the Governor's Recodification Committee, deserve careful consideration.

Tourist income within a few years will be a business which will bring to Montana in excess of 100 million dollars annually. Certainly we should provide an adequate appropriation for the advertising department.

The excellent program of development of our state parks, the unexcelled progress which has been made in the development of the Historical Library and the upsurge of private initiative to provide tourist attraction facilities, all combine to give us real hope that we can keep this important segment of our economy on an expanded basis.

There is a possibility that the Governors' Conference in 1956 might be held at Glacier Park, and I hope to discuss this some time in the next week or so with your committees.

I wish time would permit me to detail to you the need for review and consideration of the proposals as well as the splendid work of such departments as the Departments of Public Welfare, Agriculture, and Labor, the individual custodial institutions, the Unemployment Compensation Commission, the State Examiner, State Controller, Industrial Accident Board, the Department of Vocational Rehabilitation, the State Land Board, Veterans' Welfare and the Liquor Control Board. Civil defense is proving its value and has become a must because of the Red menace and the danger of hydrogen bombs.

Improvements in the fields of unemployment insurance and workmen's compensation should receive attention. Each department will give you detailed information relative to the programs and the recommendation of the federal agencies. Then, too, labor and management will have proposals for your consideration.

Also I believe state, county and municipal employee retirement, social security and per diem should be studied.

Since the Board of Health and Livestock Sanitary Board have asked for such substantial increases in appropriations, it is imperative their programs be scrutinized in detail. The financial and accomplishment record of the Department of Public Welfare has been outstanding. So has that of the Oil and Gas Conservation Commission. By your direction, a report has been prepared of the underground gas storage problem for your consideration.

The Governor and his staff, likewise the Controller, do not have facilities to make the investigations and analyze the budget requests as they should be, which makes it absolutely necessary for the legislative committees to examine all appropriation requests. In order to keep word with you, particularly the members of the Senate Finance and Claims Committee, and the House Appropriations Committee, I want to advise that there will be no request for a deficiency appropriation from the Governor's office. It is imperative that all appropriations be scrutinized on the basis of responsibility and the job to be done.

Several times during the past year I have met with the Personnel Commission and reviewed with them the material which they have for your consideration. It merits individual study by the legislators and certainly the reports and recommendations of the commission should be thoroughly studied and analyzed by appropriate or special committees.

Incidentally, while I am referring to special committees, again it might be advisable to have special committees visit some of the custodial institutions, as they did two years ago and make reports early in the session.

It is my hope that the Finance and Claims Committee of the Senate and the Appropriations Committee of the House will schedule a joint meeting with the Governor and Controller shortly after they are organized in order that the general problem of appropriation requests and estimated income might be discussed and broad outlines arrived at as to how the budget can be balanced. The Controller, as required by law, has submitted to you a balanced budget. But there has been no opportunity for subsequent review.

The Board of Examiners has withheld going ahead with plans for the Executive Mansion, authorized by the 33rd Legislative Assembly, for the reason that it does not feel that sufficient funds were provided.

No doubt your committees will find ample need for additional funds from the Capitol Land Grant fund to complete renovation of the State Capitol.

The Governor's Mental Health Committee is to be commended for its leadership in acquainting the general public with the needs at the State Hospital at Warm Springs and the State Training School at Boulder. This group has been recommissioned with the charge to have task forces make studies of all of the custodial institutions.

After adjournment of the 33rd Legislative Assembly, the Board of Examiners, after consultation with representative members of the Senate and House, entered into negotiations for the purchase of a ranch for the Prison. This was in conformity with enabling legislation and an appropriation wisely passed by the 33rd Legislature. The Prison, charged with the responsibility of rehabilitating society's outcasts, now has a solid foundation on which to build a modern prison facility. It is my sincere hope that each and every legislator will take the time to drive to Deer Lodge and inspect the prison facilities, as well as study the plans for future rehabilitation of the inmates.

In connection with the rehabilitation program it is mandatory for this legislative assembly to set up a new pardon board in conformity with the amendment to the Montana constitution approved by the voters at the November election. It is also timely to review and revamp the probation

and parole law and to provide a modern system in conjunction with the new pardon board. Information from other states which should prove helpful has been obtained.

In all of the custodial institutions we must not only think of the increasing number which come in the door and create the need for expanding facilities, but we must concentrate more and more on a program which will permit the return to a useful place in society.

The responsibility of these various institutions should not be the concern of a handful of employees and state officials, but of all the people. That is why it seems advisable that this problem which is resulting in an increasing expenditure of the tax dollars should be thoroughly understood. We should not skimp in meeting the demands but neither should we be over-generous.

We should correct the World War II Bonus Law so that the next of kin of deceased veterans will receive a minimum of \$500.00. The inadvertent harshness of the present law has caused the next of kin of three Pearl Harbor victims to receive nothing and 269 others to receive from \$10 to \$100.00. Sufficient funds are on hand to pay the entire amount, estimated at \$470,000.00.

A serious menace to our society is the motor traffic hazard. All of us believe and preach the doctrine of highway safety. But it was a surprise to the Highway Patrol Supervisor and his staff, more especially the Highway Patrol Board, and certainly to the Governor, to learn that the practice of issuing limited licenses to those convicted of drunken driving had been in vogue for several years. When the implications of that policy became known, an immediate stop was put to the practice. But prior to that time, 843 limited licenses had been issued. Could one blame a patrolman, officer, or justice of the peace, for losing his temper when he would see a man convicted for being a menace to the highway, driving as a result of a limited license within a few weeks after his conviction? I am happy to say that now when licenses are revoked, they are revoked, and that there is no special privilege. If we are going to have law enforcement, the same rules must apply to every individual and there must be no back doors to special consideration.

The Highway Patrol has improved in efficiency in all departments but there is the constant job of acquainting the public with the importance of highway safety. The mileage driven increases day by day, but the death rate per hundred million miles of travel in Montana has been reduced from 9.43 deaths in 1952 to 8.52 deaths in 1953 and 7.59 deaths in 1954.

A substantial increase in appropriation is requested and your committees will have to analyze the need as against potential revenues. Certainly we cannot relax in our efforts to try and reduce the accident and death toll on the highways. We can indeed be thankful that a reduction was made in 1954.

Several months ago I declared that highway financing constitutes the number one problem in Montana. As indicated previously, the matter of evaluation of tax collection and distribution is an important item and to emphasize its importance I requested a joint session to hear the facts on this question. But for the reason that I think highway finance and your highway program is so important to each and every one of you I again respectfully request, Mr. President and Mr. Speaker, either another joint session to be held in the next day or so to discuss the highway program as it has been operating in the past two years, as well as the recommendations of the Governor's Highway Finance Committee or in such manner as your bodies determine. Continued progress in highway development is a must not only to encourage expansion of our own economy, but to attract tourists.

We have a backlog of approximately five million nine hundred thousand dollars in unmatched federal aid and increased federal aid grants indicates

our need for an additional three million five hundred thousand dollars to four million dollars per year. The Governor's Interim Highway Finance Committee has devoted considerable time and effort to developing recommendations which I endorse and submit for your consideration. However, this subject is far more important and cannot be dealt with in a few minutes discussion by the Governor in his message. That is why I request that you permit the State Highway Engineer and the chairman of the Governor's Interim Highway Finance Committee to detail this program to you as quickly as possible. I know that you will find the Highway Commission, the Highway Department and the Governor's Interim Committee ready and willing to give you all possible information.

Actual work placed under contract by the Highway Commission during the calendar year 1954 will approximate 15 million dollars as compared with an average of 11 million dollars per year for the previous five years. This has been made possible by increased income, and by savings in maintenance costs of approximately 675 thousand dollars per year for each of the calendar years 1953 and 1954 as compared with costs per year in 1951 and 1952.

There is much more to tell you but it is difficult to try and cover everything in this short time. I am sure that you will find every state employee ready and willing to give you any information you desire. None of us can shirk our responsibilities. Certainly we want to be fair to labor, agriculture, business and to professional men and women, and all taxpayers. Above all, we must be fair to our children and their children to come.

WE MUST BALANCE THE BUDGET.

WE MUST SUBSTITUTE BUSINESS FOR POLITICS.

We must provide the climate for progress. None of us are miracle men and no one of us can do the job alone; but working together, and with God's help, we can succeed.

J. HUGO ARONSON, Governor.

It was moved by Senator Larson, and carried, that one thousand copies of the Governor's message be printed and distributed to the members of the House and Senate, and to other state offices.

It was moved by Senator Larson, and carried, that the joint assembly be dissolved and that the members of the Senate repair to the Senate chambers.

The report was adopted and the Speaker thanked the committee, which was then discharged, having made its final report.

To the Members of the House of Representatives:

Mr. Speaker:

The first study of the truck tax problem began in Oregon in 1935. The whole purpose of this study was to determine what share of the cost of highways should be borne by truck and bus transportation. This study was completed in 1937 and brought two significant things to light. First, that a basic vehicle size should be determined. A car or light truck being of about the same size and weight therefore consumed about the same amount of fuel. This being the case, a road should be built to a standard of construction which would support vehicles of this size. The second factor established by this study was that vehicles of greater size than cars and light trucks did not use the same amount of fuel; neither did they consume the same amount of space in road use, and it was necessary to build heavier roads to support heavier traffic.

Problems involved to accommodate all users are numerous; provide geometric features, such as sight distance, climbing lanes up hills for trucks

to allow lighter units to pass without holding up traffic, proper curvatures for long truck trailer combinations, proper bridge widths and safe load carrying capacities.

Engineers established the cost responsibility for each class of vehicle. It was this study which established the one-third cost responsibility of the heavier vehicles. Subsequent Oregon Legislative Interim Committees made additional studies and verified this cost responsibility.

It was felt that this class of heavy vehicle owners received the benefit of proper highway construction and that such adequate construction enabled them to cut their operating costs and to give better service to their customers.

The first ton mile tax in the west was assessed in the state of Oregon and this system of ton mile taxation was in effect until 1947, when the present method of taxation was changed from a ton mile to the weight distance tax. This is the present tax system in effect in Oregon today.

The present form of weight distance tax was adopted in Oregon in 1947, and was submitted to the voters of Oregon both in the form of a referendum and a constitutional amendment. We understand the people of Oregon in the subsequent election supported by a large majority the weight distance method of taxation.

Our first morning was spent with Mr. Hester, administrative assistant to the chief engineer of the Oregon Highway Commission, who briefed the committee in a general way on the weight distance tax as it applies to Oregon today. One of the interesting features about the collection of the weight distance tax is the collection of the various fees which is handled by the Public Utilities Commission of the state of Oregon. There are three separate departments within the Motor Carrier Division of the Public Utilities Commission. One is administration; Two is issuing Public Utilities Commission license plates; Three is the collection of the weight distance tax.

According to responsible officials, the mileage tax is a very easy one to administer. In substantiation of this statement it was pointed out that interstate trucking operators must keep certain records for the Federal Interstate Commerce Commission and that these same records contain the information necessary to file certain reports under the Oregon system. To determine fuel consumption per unit is much more difficult. At one time Oregon allowed certain fuel tax credits on their weight distance tax, but this did not operate satisfactorily and was abandoned.

It is believed desirable to have a modest registration fee on vehicles to cover costs of administration, etc. Oregon bases this on the "light weight" of trucks at the rate of 70¢ per 100 pounds. This is also very desirable from a reciprocity viewpoint. The basis of classification in Oregon is the weight of the vehicle plus the maximum load to be carried. The operator then pays a tax rate based on the total mileage travelled within the state of Oregon on all highways except upon private roads. The Oregon system is not a ton-mile tax system. In commenting upon the ton-mile system, they felt it was extremely difficult to administer and caused a great deal of extra work for the trucking industry.

In 1949 Oregon set two basic weight distance rate schedules. One was a lower tax rate schedule that applied to vehicles using gasoline purchased within the state of Oregon (Oregon levies a 6¢ a gallon tax, the same as Montana). The second, a higher rate schedule applied to all other vehicles, including those using Diesel and also those purchasing gasoline outside the state of Oregon. The difference between the two tax schedules was based upon several studies.

The Oregon officials outlined a situation which was of interest. They stated, for example, that a California truck could enter Oregon with a large supply of gasoline and that this truck could travel northward through Oregon to Washington to its destination; and could return back through Oregon

to its home terminal in California without buying any gasoline in either Oregon or Washington. Under the illustration used, this California operator would pay, under the weight distance tax, approximately \$4,000.00 to the state of Oregon. They ventured the opinion that this same operator probably paid nothing in the way of taxes to the state of Washington, which has a gross vehicle weight tax system plus the regular gasoline tax. It should be noted that no Diesel tax is collected in Oregon when the rate schedules previously mentioned are applied. A major portion of the administration of the weight distance tax in Oregon is placed under the Public Utilities Commissioner. This office corresponds to a certain extent to our Montana Board of Railroad and Public Service Commissioners. However, the Oregon system has one man who is a commissioner and who receives a salary of \$11,500 a year.

All commercial vehicles and all private vehicles over 6,000 pounds gross vehicle weight are under the Public Utilities Commission. It is important to note that no property taxes on vehicles are levied in Oregon, either by city, county or state. The weight distance tax money goes into the Oregon highway fund along with other highway fees and taxes. Then, by statute, the cities of Oregon receive 10%, the counties 19%, and the state 71% of said highway funds. Some difficulty exists in apportioning moneys to the counties and cities due to the fact that certain vehicles may be licensed in one county and the major portion of their highway travel may be in a different county.

In 1953 there were 14,235 Public Utilities Commission operators in Oregon using a total of 55,300 vehicles. Two per cent of the carriers in Oregon operate 38% of the Public Utilities Commission units.

In Oregon it appeared that there was excellent cooperation between all agencies having anything to do with the administration of the weight distance tax. For example, the state police make observation reports concerning the location, time and direction of movement of any Public Utilities Commission unit which they encounter in their other activities on the highways of Oregon. We were told that the extra duties involved in this did not necessitate additional personnel in the state police.

We were informed that many states are considering a similar type of legislation, and it was estimated that at one time or another, at least one-half of the states had sent delegations or committees to Oregon similar to ours. They stated that in the administration of the weight distance tax in Oregon it required little or no additional help in the highway department and no additional personnel in the state police. The departments directed to take part in the administration of the act employed approximately 112 people. Weigh masters under the highway commission perform certain duties in connection with the weight distance tax system; and are an integral and important part of the program. Whenever they weigh a Public Utilities Commission vehicle in the course of their highway duties, the weigh masters complete observation slips similar to the ones filled out by the state police. These observation slips are simple in form and report time, Public Utilities Commission number, location and direction of travel of the vehicle, and these slips are forwarded to the audit division for later checking against operators' mileage records.

Their motor revenue department has a total of approximately 70 employees. Included in this department, and counted in the total number of employees above, is their system of 17 field offices. These field offices are located in strategic and important towns in Oregon. Each office has at least one auditor and a clerk. There is a total of 35 auditors and clerks working in these 17 field offices.

The accounting section has a total of 35 people employed of whom 20 to 25 could be charged to the administration of the weight distance tax.

In 1954, the weight distance tax in Oregon reached a total of \$10,944,000 revenue for the Oregon State Highway Commission to use in its highway

program. It was anticipated that the total revenue for 1955 would be approximately \$12,000,000.

As an example of one of the costs of administration, 11,000 audits were made in 1954, costing the state of Oregon \$237,000. However, as a result of these audits, there was recovered for the state of Oregon a total of \$433,000, or \$205,000 more than their cost.

The auditing department tries to audit all carriers under its jurisdiction at least once every two years. They have not been able to achieve that objective. Currently there are 25,700 accounts subject to audit in Oregon. Slightly over 7,000 of these are over two years old; but 2,000 of this number have been assigned to auditors and will be completed in the near future. Carriers do not like it when audits are over two years old, as it places an additional burden upon them.

It was emphasized to us that the local field offices should do as much of the auditing as possible, in the interests of better service.

The average number of accounts auditors are able to make per month is decreasing. It was felt that this might be due to a recent 40% increase in weight distance rates, which could lead to more attempted evasion. In other words, excessive rates would encourage evasion of the tax. Not only do the excessive rates lead to more evasion, but also increase the cost of administration, due to the greater amount of auditing necessary and checking required to prevent evasion.

While Oregon attempts to make a 100% audit of all accounts subject to audit, the Stanford Research Institute recommended instead spot checking accounts.

Personnel in the accounting department felt that some weight distance taxes are lost due to the fact that their field offices were closed on Saturday and Sunday and they felt that some weight distance taxes are lost and they felt that some truckers were taking advantage of that.

Where freight rate increases have been granted, it was the opinion that the weight distance tax is a small factor in such freight rate increases; other costs, such as labor, material and equipment costs have advanced a great deal more than the tax factor. Sufficient revenues are important in the building of good highways and good highways save trucking operators money. As an example, highway No. 30 running along the boundary between Oregon and Washington was used as an illustration. The highway is located in Oregon and is a modern, up to date, water grade route. This parallels a Washington highway which is just across the Columbia river. Despite the fact that there is a weight distance mileage use tax in Oregon and none in Washington, and despite the fact that it would be an easy matter for a trucker to cross the Columbia river and travel the Washington highway, we were informed that Oregon highway No. 30 was carrying an ever-increasing amount of truck traffic.

The declaration was made to us by department heads that any state adopting a weight distance tax system must establish a very good auditing department in order to make the system function.

The reporting forms used for the weight distance mileage tax by carriers subject to it appear to be relatively simple in form. Carriers report, among other things, the monthly mileage traveled inside the State of Oregon. Payment of this tax was computed by the reporting carriers and payment was usually attached to the monthly report.

Thirty per cent of the monthly tax reports submitted to the accounting section involved tax payments of \$5.00 or less, according to an estimate furnished us. One of the largest payments made by one of the bigger operators amounted to \$59,555.15, for the month of December, 1954. In this case this was the weight distance tax paid to the state of Oregon by that firm for the total number of miles traveled in Oregon upon its public highways.

The accounting department has an IBM system, but department heads would not recommend it for use in Montana, because our monthly volume of business would not justify the \$2,500.00 monthly rent Oregon is paying for such a system.

All commercial vehicles in the state of Oregon whether they be private, contract, or common carriers all come under the Public Utilities Commission and must receive plates from this department, designating the class carrier. According to the information furnished the committee, there are 14,235 operators operating under the Public Utilities Commission. These operators operate 55,300 vehicles and each vehicle must carry an identification plate. Of the 55,300, approximately 10,000 chose the flat fee.

There are certain trucks and trucking operations in the state of Oregon that are exempt from the weight distance tax and which pay in lieu thereof a fee established by law. The most important exemption under the Oregon law was the exemption of all farm trucks. In Oregon farm trucks pay no weight distance tax, but pay a registration fee somewhat similar to our Montana gross vehicle weight system. The tax in Oregon on such farm trucks is at the rate of 50¢ per 100 pounds, actual weight of the truck unloaded. (Certain other trucks and trucking operations in Oregon are entitled to use a flat fee instead of paying the weight distance tax; and this rate is 70¢ per 100 pounds of actual weight unloaded of the vehicles.)

Oregon studies on highway use showed a large number of farm trucks were low mileage operations. Farm trucks do not come under the Public Utilities Commission as they are considered to have little in common for taxation purposes with commercial carriers. The statement was made that most Oregon farm vehicles were single units, burning gas upon which the Oregon state gas tax of 6¢ per gallon had been paid. This report also showed that 27% of the farm trucks are under 6,000 pounds; and that 90% of the Oregon farm trucks are under 18,000 pounds GVW. Less than 1% of the farm vehicles in Oregon were over 28,000 pounds GVW.

The Public Utilities Commission is authorized to assess an estimated mileage to cover certain unique types of operations and to do this also in the case of trucking operators who fail to make the required monthly mileage reports. The transfer and delivery trucks operating all within the city do not come under the Public Utilities Commission.

Charges were and are made, that there is a considerable amount of evasion under the weight distance tax system in Oregon. The Western Highway Institute audit claimed that the evasion was approximately 30%. As a result of such charges, Oregon employed the Stanford Research Institute to investigate and make an extensive study of the estimated amount of evasion of the tax in that state. This work cost Oregon \$15,000. We were informed that the Stanford people took the most unfavorable view possible whenever there was a choice, and yet came up with the very definite conclusion that there was only 4½% evasion of the weight distance tax in Oregon. (Later, when we were touring the audit division, we were told that in the Oregon system of auditing, almost all of the 4½% evasion was recovered by the Oregon auditors.)

Apparently, Oregon allows considerable discretion, to be vested in the Public Utilities Commission. To take care of unusual situations some permits are granted with special fees. For example, a trucking operation might be entirely upon private roads, except when such operation would simply cross over a primary highway; and in this case the trucking operator could secure a permit from the Public Utilities Commission and make payment to them, a fee considered to be proper by the Public Utilities Commission.

We met with leaders and representatives of the truck transportation industry in Oregon. They were of the opinion that weight distance taxes would lead to increased freight rates which would be passed on to the consumer. It was their opinion that there were too many exemptions in the

Oregon law. As one of them put it, "If the system is good for one, it should be good for all; and everyone operating trucks under the weight distance system should be treated alike." It is only fair to point out that in Oregon, higher rates prevail on the same commodities for like mileages over those now in effect in Montana. However, this situation has prevailed for a number of years.

We found no one who did not agree that the system in Oregon was operating satisfactorily. While it might not be perfect, it is considered by everyone in authority to be a step in the right direction. There was some disagreement as to the amount of tax being evaded. The carriers' biggest complaint was that they felt that there were many small carriers who were getting by without paying the tax that was due the state. However, this could not be verified.

If we in Montana were to adopt a similar law, this would have to be carried on either under the present Montana Railroad Commission, a new department set up in the Highway Commission, a new department perhaps to be known as the Motor Vehicle Administration, or some similar name.

Under the present system in Montana, there is no way to determine how many individual operators both intrastate and interstate are operating in Montana today. The only information we have is that there are approximately 6,844 Montana Railroad Commission plates issued by the Montana Railroad Commission to trucks, buses and taxicabs operating in Montana. Of the 6,844 Montana Railroad Commission plates issued in Montana, approximately 5,000 are property carriers both interstate and intrastate—the balance being taxicabs and buses both city and intercity.

Comparing Montana with Oregon, there are 55,300 single units under the Public Utilities Commission, which includes all commercial vehicles using the highways, whereas in Montana only those operating under authority of the Montana Railroad Commission are required to carry plates.

In 1953 Montana had approximately 96,132 motor trucks and buses. Of this number, some 52,820 are registered as farm vehicles.

Of the remaining 43,312, 22,452 are under 6,000 pounds, leaving 20,860 trucks and buses. Of this number, there would be exempt under the Oregon law, all trucks and buses operating within the city or within a radius of three air miles of the same. This, of course, would take in all transfer and bus companies operating within the local areas.

There would still be further exemptions if the Oregon law was applied to Montana. These probably would not run to any great number. It would be fair to estimate that there would be approximately 17,000 to 18,000 Montana trucks and buses that would operate under the Oregon weight distance tax formula. To this number of trucks and buses would be added a great many interstate trucks and buses of which we have no record and no way of obtaining such information.

Montana being a bridge state between the Pacific northwest and the east, there are undoubtedly a great many interstate trucks and buses operating into and across Montana.

OBSERVATIONS

Personnel within the Oregon State Highway Commission and Public Utilities Commission with whom we met, appear to be highly intelligent, well qualified, and capable administrators. These people were sincere and well versed in the Oregon highway program and its tax systems. Among these men we observed a close relationship of cooperation between their departments.

Our meeting with the trucking industry people demonstrated that these were also top men in their business. They very seriously, intelligently, and fairly presented their point of view on the weight distance tax system.

We had the opportunity to discuss highway matters with outstanding members of the present Oregon legislature, as well as the Governor of Oregon. From these people we gained the impression that the weight distance tax system was working well in Oregon and that under no circumstances would they abandon it. They seemed to feel that it had been well accepted by the majority of the people of Oregon and that it was an equitable system of taxation. They admitted that there were minor flaws which required legislative correction from time to time. Most all of them urged that if we were to adopt such a system in Montana, it should be done after careful preparation and study. They seemed to wholeheartedly approve of the system of interim committees of the legislature going into such matters and preparing necessary legislation between sessions of their assembly.

The continuance of the weight mile tax as a means of highway taxation in Oregon is endorsed as recently as January 1, 1955, by the Oregon legislative Highway Interim Committee in their report to the legislature, which report reads in part: "and until such time as it is established and proved a more equitable and rational means of applying a highway-use tax is devised, our present weight-mile tax should not be disturbed."

CONCLUSIONS

We believe the weight distance tax as applied in Oregon is an equitable means to recover costs of highways from users, in proportion to cost responsibility.

We therefore recommend from the information contained in the foregoing report that the weight distance tax system in Montana be adopted only after careful and proper consideration and preparation.

REPORTS OF SELECT COMMITTEES

The committee appointed to study the Personnel Commission submitted the following report:

"Your Committee appointed to study the Personnel Commission hereby submits its report. Members of the committee are: Charles Cerovski, John MacDonald, Tom Haines, and Fred Broeder. We interviewed all four members of the commission, the director and assistant director. We also studied the minutes of the commission, the applications of various individuals seeking the position of director, the report of the commission to the legislature and various other pamphlets and booklets in the personnel commission office.

CONCLUSIONS AND FINDINGS OF FACT

In accordance with chapter 251, laws of 1953, the governor appointed the following men to the Personnel Commission: Mr. C. M. Wall, Mr. Dale Woods, Mr. Jesse Fletcher and Mr. Harold G. Stearns. In the opinion of your committee all four men are substantial citizens and have the welfare of the state in mind. Your committee finds, however, that the members of the commission each had a different opinion as to how to fulfill the task for which they were appointed. The result was indecision and an incomplete program by the time the 1955 legislature met. The failure of the commission to accomplish its assignment as prescribed by law, and the lack of coordination within the commission itself, can be blamed in part on the lack of personnel experience of its members.

After the commission was appointed, they advertised for a director. Some 40 individuals made application and these were screened down to 7 who appeared personally for interviewing. Most of the latter group had excellent qualifications and personnel experience but the commission decided on Mr. A. E. Burgan primarily because he had never been in government employment and supposedly would not be biased in dealing with state employees. Mr. Burgan offered as his qualifications: service in the United

States navy, stockholder and secretary of the Blacktop Company of Billings, and shop supervisor of the Northern Pacific Transport, also of Billings.

Your committee is of the opinion that Mr. Burgan does not have the qualifications required by the statutes, nor does he have the personality needed to create a good feeling between the personnel department and the employees of various departments and offices. The statute requires that a director have three years of personnel experience. The commission met in private session six months ago and agreed that their choice in Mr. Burgan was not a good one, but they decided by that time, that it was too late to make a change and expect to have anything to submit to the legislature.

Although not provided for by the personnel act of 1953, one of the first activities of the director was a loyalty oath of all state employees which was later abandoned.

Sometime in the fall of 1953, the director designed a form which was submitted to each employee of the state, to be filled out by him, stating the type of work he performed. This form was checked by the department head for accuracy and returned to the Personnel Commission. In many instances the department head, fearing that their employees' classification might be lowered, "doctored up" this classification form before returning it to the Personnel Commission. Consequently, many of the job classifications were inaccurate and served no beneficial purpose to the Commission.

Mr. Bassford, the assistant to the director, prepared specifications for each state job, based upon the forms submitted by the various employees. This work was completed in August, 1954. Since the 1953 personnel act required that the commission set up classifications with equal-pay-for-equal-work, the next task was to classify each of the job specifications in groups requiring equal ability, equal education, and equal experience. The commission then prepared a salary level plan with 49 various levels and attempted to place each job specification in the proper salary level. The minutes of the commission show that there was much disagreement and dissent and it seemed that they could not agree on the proper salary level for the various job classifications. The commission, finding itself with little time remaining before the legislature would meet, decided on December 13, 1954, to abandon all of the data compiled during the previous year and a half and simply use the salaries being paid on July 1st, 1954 as the basis for classifying the various employees. By doing this the commission was aware of their not fulfilling the requirements of the law, but it was a last minute attempt to at least offer something to the legislature. Using the July 1, 1954, salaries as a basis for job classifications, your committee believes that the inequities found in wages paid by the various departments in the past are certainly not corrected by this type of compensation plan. We feel that the purpose of the 1953 law, equal-pay-for-equal-work—can only be attained by using the type of work performed by each employee rather than the salaries being paid as of July 1, 1954. The commission wasted considerable time on insignificant matters until the latter part of 1954. Four or five monthly meetings were almost wholly spent on determining the size of budget to submit to the legislature. Rules and regulations as required by the statutes were discussed at various meetings but never adopted by the commission.

Senate Bill 76—proposed by the commission—provides for a salary level which required not more than a few hours to prepare. This salary level is a table of figures with no meaning whatsoever inasmuch as the figures have no designated relationship to job classification. This leaves the commission free at the end of the session to arbitrarily place a job into any compensation level they desire. The intention of the law was to give the 1955 legislature an opportunity to see how the salary inequities of the past have been remedied and to adopt a plan which would eliminate those inequities. Senate Bill 76 is merely part of a plan and by ratifying this "so-called compensation plan" the legislature is actually approving nothing.

RECOMMENDATIONS

Your committee feels that there is a need for uniformity in salaries among state employees for like work. This need existed in the past and was the motivating purpose for establishing the Personnel Commission two years ago. We, your committee, recommend that the present law be so amended as to provide that the board of examiners be granted the authority to appoint members of the commission and the commission in turn the authority to appoint the director. This would conform with the constitutional authority of the board of examiners. Article 7, section 20, of the constitution provides, "No claim against the state, except for salary and compensation of officers fixed by law shall be passed upon by the legislative assembly without first having been considered and acted upon by the board of examiners."

The present Personnel Commission has no authority to make final salary changes without the approval of the board of examiners. For this reason, we feel that the Personnel Commission should be made a part of the board of examiners.

Your committee further recommends that each commissioner appointed by the board of examiners have at least five years' experience in personnel work. This provision would facilitate the work of the director in that the commissioners would be able to contribute experienced advice and recommendations. Personnel administrations in other states provides for experienced commissioners.

Your committee also recommends that adoption of any compensation plan be left to the board of examiners rather than the legislature, as is now provided by the 1953 act. This would provide greater flexibility to the personnel law and would permit the compensation plan to be put into effect before the 1957 legislature convenes."

Respectfully submitted:

CHARLES CEROVSKI,
JOHN J. MacDONALD,
TOM HAINES,
FRED BROEDER.

It was moved by MacDonald that the report of the committee be adopted and that sufficient copies be mimeographed for distribution to the members of the house.

A substitute motion was made by Armstrong that the report be amended by deleting that portion of the first paragraph of the section entitled "Recommendations", beginning in the fourth line with the words "We, your committee," and including the remainder of the paragraph, and, as so amended, be adopted, which motion carried.

MESSAGES FROM THE GOVERNOR

February 19, 1955.

Honorable George M. Gosman,
President of the Senate.
Honorable Leo C. Graybill,
Speaker of the House.
Sirs:

House Bill No. 97 is returned herewith without my approval for the following reason:

An extension of pari-mutuel betting to small communities in Montana does not seem advisable to me.

Therefore, I am returning House Bill No. 97 without my approval.

Yours sincerely,

J. HUGO ARONSON,
Governor.

The Speaker asked for a roll call vote on the question as to whether or not House Bill No. 97 become a law notwithstanding the governor's veto. A two-thirds vote being required, the governor's veto was sustained by the following vote:

MESSAGES FROM THE GOVERNOR

February 19, 1955.

Honorable George M. Gosman,
President of the Senate.
Honorable Leo C. Graybill,
Speaker of the House.
Sirs:

I am returning without my approval H. J. M. No. 5 for the following reasons:

The Legislature has previously passed, and I have approved, memorials to the Federal Congress asking that more funds be provided for various activities. It seems to me to be inconsistent, in view of the size of the Federal debt and the published condition of the Federal budget deficiency, to ask both for more funds and tax relief at the same time.

Furthermore, I do not believe that this legislature is sufficiently informed on Federal fiscal problems to make the request contained in H. J. M. No. 5. My announced policy of a balanced budget for Montana expresses my belief as far as the Federal budget is concerned, and I am informed that the revenue raised by the Federal Income Tax would be seriously reduced by the request contained in H. J. M. No. 5.

For these reasons, I am returning H. J. M. No. 5 without my approval.

Yours sincerely,
J. HUGO ARONSON,
Governor.

The Speaker asked for a roll call vote on the question as to whether or not House Joint Memorial No. 5 become law notwithstanding the Governor's veto. A two-thirds vote being required, the Governor's veto was sustained by the following vote:

Ayes: Anderson (Cascade), Barnard, Barrett, Beck, Bick, Cerovski, Clowes, Cumming, Cunningham, Daniels, Dempsey, Durkee, Emmons, Gershmel, Goodgame, Grant, Gunderson, Hagenston, Holecek, Holtz, Hooks, Jensen, McAndrews, McInnis, McOmber, Mahoney, Mangan, Michels, Mountain, Nelson, Nixon, Parker (Pondera), Parker (Wibaux), Picotte, Reardon, Regan, Ringling, Schumacher, Wood, Mr. Speaker. Total 40.

Noes: Anderson (Yellowstone), Armstrong, Baumgartner, Baxter, Bentz, Bricker, Broeder, Chaffin, Conrad, Crist, Felt, Fulton, Gebhardt, Gerard, Goan, Haines (Flathead), Haines (Prairie), Hancock, Howard, Juedeman, Leuthold, Mysse, Nelstead, Nichols, Norby, Nybo, Phillips, Pierce, Powell, Purdy, Reed, Sales, Sax, Sippel, Smith, Tange, Taylor, Walton, Wetzsteon, Wilson. Total 40.

Absent and not voting. Haines (Missoula), Hawks, Lee, Loughran, MacDonald, Rieder, Tobin. Total 7.

Excused: Allen, Clark, Fry, Gleed, Hess, Minette, Siderius. Total 7.

MESSAGES FROM THE GOVERNOR AND SENATE

Mr. Speaker:

I am directed by the Senate to inform your Honorable Body that the following House Bills were this day recommended for non-concurrence by committee action, reports adopted, and the bills are herewith returned to the House:

House Bill No. 330 by Emmons, McAndrews.

House Bill No. 177 by Chaffin.

House Bill No. 169 by Reed, Juedeman.

House Bill No. 153 by Anderson (Yellowstone), Picotte.

Respectfully,

FRANK W. HAZELBAKER,
Secretary of the Senate.

Mr. Speaker:

I am directed by the Senate to inform your Honorable Body that the

Senate this day acceded to the request of the House and is herewith returning Senate Bill No. 58 to you for further consideration.

Respectfully,

FRANK W. HAZELBAKER,
Secretary of the Senate.

Hon. Leo C. Graybill,
Speaker of the House.

Dear Sir:

I have the honor to advise you that I have this day approved the following measure:

House Bill No. 51, introduced by Crist, Gebhardt, Durkee, Mangan.

Yours sincerely,

J. HUGO ARONSON,
Governor.

Hon. Leo C. Graybill,
Speaker of the House.

Hon. George M. Gosman,
President of the Senate.

Sirs:

I am returning H. B. 48 as amended by the Senate without my approval for the following reason:

This bill would provide for special license plates for amateur radio operators. While I realize the importance of amateur radio communications in times of emergency and the willing devotion of this fine group to service in emergency situations, I do not believe that special license plates should be established for any group. Establishment of special plates would be a precedent for special plates for various public service groups, and I do not feel that such a move in Montana is advisable.

Therefore, I am returning H. B. 48 without my approval.

Yours sincerely,
J. HUGO ARONSON,
Governor.

The Speaker called for a roll call vote on the question as to whether or not House Bill No. 48 shall become law notwithstanding the veto of the Governor. Thereupon the Governor's veto was sustained by the following vote, a two-third vote being required:

Ayes: Anderson (Cascade), Barnard, Barrett, Baxter, Beck, Bick, Cerovski, Chaffin, Clark, Clowes, Cunningham, Daniels, Durkee, Emmons, Felt, Fulton, Gebhardt, Gershmel, Goan, Grant, Gunderson, Hagenston, Hess, Holecek, Holtz, Howard, Jensen, Lee, Loughran, McAndrews, McInnis, McOmber, Mahoney, Mangan, Minette, Mountain, Nelson, Norby, Parker (Pondera), Picotte, Purdy, Reardon, Regan, Sales, Schmuacher, Siderius, Smith, Walton, Wood, Mr. Speaker. Total 50.

Noes: Armstrong, Bentz, Bricker, Broeder, Conrad, Crist, Cumming, Fry, Gerard, Gleed, Haines (Flathead), Haines (Prairie), Hancock, Hawks, Hooks, Juedeman, Leuthold, Michels, Mysse, Nelstead, Nichols, Parker (Wibaux), Pierce, Powell, Reed, Ringling, Sax, Sippel, Taylor, Wetzsteon, Wilson. Total 31.

Absent and not voting: Anderson (Yellowstone), Baumgartner, Dempsey, Haines (Missoula), MacDonald, Nixon, Nybo, Phillips, Rieder, Tobin. Total 10.

Excused: Allen, Goodgame, Tange. Total 3.

Hon. Leo C. Graybill,
Speaker of the House.

Hon. George M. Gosman,
President of the Senate.

Sirs:

I am returning H. B. 277 without my approval for the following reason:

H. B. 277 would require stamping or tagging of all meat handled by locker plant processors down to quarters, and would eliminate the use of "declarations of ownership." This provision so far as stamping of domestic meat is concerned seems workable. I can understand the law enforcement benefits of such a provision. However, as to wild meat, it is not possible under our present laws for duplicate game tags to be issued for each quarter of meat. Therefore, it would become impossible for locker processors to handle divided game animals. This would be unduly restrictive on distribution of wild meat resulting from the traditional sharing by members of families or of hunting parties. I do not feel the law enforcement benefits to be gained are sufficient to place such a restriction on the handling of meat.

For this reason, I am returning H. B. 277 without my approval.

Yours sincerely,
J. HUGO ARONSON,
Governor.

The Speaker asked for a roll call vote on the question as to whether or not House Bill No. 277 shall become law notwithstanding the veto of the Governor. Thereupon, a two-thirds vote being required, the Governor's veto was sustained by the following vote:

Ayes: Barnard, Beck, Cerovski, Clark, Clowes, Daniels, Gunderson, Wood. Total 8.

Noes: Anderson (Cascade), Anderson (Yellowstone), Armstrong, Barrett, Baumgartner, Baxter, Bentz, Bick, Bricker, Broeder, Chaffin, Conrad, Crist, Cumming, Cunningham, Durkee, Emmons, Felt, Fry, Fulton, Gebhardt, Gerard, Gershmel, Gleed, Goan, Grant, Hagenston, Haines (Flathead), Haines (Prairie), Hancock, Hawks, Hess, Holecek, Holtz, Hooks, Howard, Jensen, Leuthold, Loughran, McAndrews, McInnis, McOmber, Mahoney, Mangan, Minette, Mountain, Mysse, Nelson, Nelstead, Nichols, Parker (Pondera), Parker (Wibaux), Pierce, Powell, Purdy, Reardon, Reed, Regan, Ringling, Sales, Sax, Schumacher, Siderius, Sippel, Smith, Walton, Wetzsteon, Wilson, Mr. Speaker. Total 69.

Hon. Leo C. Graybill,
Speaker of the House.

Hon. George M. Gosman,
President of the Senate.

Sirs:

I am returning House Bill No. 175 without my approval for the following reasons:

This bill proposes to place the burden of medical care of city jail inmates on the taxpayers of the county and the duty of their medical care on the boards of county commissioners and the county physician without any corresponding control or supervision. If this would become law, every drunk, injured in a fight who lands in a city jail, would get medical care from the

county poor funds. These funds are not adequate to handle such a situation. All fines in city courts go to the city treasury. City prisoners should be the responsibility of the city, including medical care.

This seems to me to be a contradiction of our established ideas of city jurisdiction and duties under city ordinances and governmental bodies as against county jurisdiction and duties under state laws. It is conceivable that in counties with more than one incorporated city or town that a county physician would be required in each town or to maintain a circuit of town jails. Presently, some cities and counties have worked out agreements to adequately handle the situation; and I do not feel that H. B. 175 would accomplish anything but a shifting of a city problem to the county poor fund.

For these reasons I am returning H. B. 175 without my approval.

Yours sincerely,

J. HUGO ARONSON,
Governor.

The Speaker asked for a roll call vote on the question as to whether or not House Bill No. 175 shall become law notwithstanding the Governor's veto. Thereupon, a two-third vote being required, the Governor's veto was sustained by the following vote:

HOUSE MEMORIAL — IN MEMORIAM

"Sunset and evening star,
and one clear call for me!
And may there be no moaning of the bar,
when I put out to sea.
But such a tide as moving seems asleep,
too full for sound or foam,
When that which drew from out the
boundless deep
Turns again home." (Alfred, Lord Tennyson).

Not garland in the black of mourning do we come this day but rather with head bowed in reverence and silence to the memory of service given to the people of the State of Montana by the Members of previous legislative assemblies who have finished their course of earthly service. Their accomplishments burn in crimson colors in the spectrum of life, remembered because of the service they gave for others. We humbly and reverently tender this day in their honor as a day of dedication to the continuance of this service which they so humbly practiced in their lives.

"So when a great man dies,
For years beyond our ken,
The light he leaves behind him lies
Upon the paths of men." (Charles Sumner).

Within the life of each colleague there burned a shining light of virtue, the radiant beauty of compassion for his fellow men. Fidelity served as a milestone along a crowded life. It was a labor of love not only in themselves, but in the lives of those who were privileged to travel beside them. Thus when each fell from the ranks of the living, we cannot grieve because each has engendered a spirit of self-sacrifice in others who have accepted the challenge to forge ahead and carry on the work which they have advanced because of their endeavors. We cannot but say of them

"Who never sold the truth to
serve the hour
Nor faltered with Eternal God
for power." (Anonymous).

Our hearts are full of the deepest gratitude for the noble course they have set for us. To each we pray our gratitude for his contribution to our people, to our state and to us individually. May their serious efforts ever serve to guide and direct others to the betterment of mankind.

"It matters not how straight the gate,
How charged with punishments the Scroll,
I am the master of my fate;
I am the captain of my soul."
"Invictus" (William Ernest Henley).

WHEREAS certain members of the former sessions of the Montana Legislature have ceased, but momentarily, their work, by death, and

WHEREAS the members of the House of Representatives of the 34th Legislative Assembly of the State of Montana pause in their deliberations to pay homage to these citizens who have served their state so well.

NOW, THEREFORE, BE IT RESOLVED, by the members of the House of Representatives of this 34th Legislative Assembly, that by this Resolution, we signify our loss at their passing and extend to their bereaved families our sincere sympathy and condolences, and

BE IT FURTHER RESOLVED, that suitable Memorials be forwarded to the widows, or families, of the deceased members and that this Memorial be spread upon the journals of this House.

Perhaps the reason trouble comes to all
 is that we find
 What friendship means—and how it helps
 when friends are kind.
 When sorrow comes to some one else
 O, God, I pray
 That I can be of service too,
 and thus repay.

In other men, sleeping—but never dead,
Will rise in majesty to meet thine own.

REPORT OF SELECT COMMITTEE
TO THE MEMBERS

OF THE THIRTY-FOURTH LEGISLATIVE ASSEMBLY

Mr. President:

Mr. Speaker:

Pursuant to a motion adopted by the House of Representatives on

January 7, 1955, authorizing five men of the House to study property evaluations for tax purposes in the State of Montana and for the purpose of studying the methods and procedures of the State Board of Equalization of equalizing and collecting taxes, a committee was appointed consisting of Representative Gunderson (Cascade) Chairman, Representative Haines (Prairie), Representative Cunningham (Silver Bow), Representative Bentz (Carter), Representative Hooks (Broadwater).

On adoption of a similar motion in the Senate on the same date a committee was appointed. Members were Senator Brenner (Beaverhead), Chairman, Senator Worden (Missoula), Senator Mahoney (Garfield) Senator James (Liberty), and Senator Keller (Stillwater).

It was understood that the two committees would work jointly and concurrently and make a joint report.

In all a total of twenty-three (23) meetings have been held since the organizational meeting of January 9, 1955.

Pursuant to the authority granted by the motion, the Joint Tax Committee subpoenaed witnesses including members of the Board of Equalization and various other individuals. Approximately fifty (50) people have been called before the Committee to give testimony, both under oath and informally. These witnesses include officials of the County Assessor's Association, County Commissioner's Association, members and employees of the State Board of Equalization, various elective county officials and other individuals possessing special knowledge and information concerning the study within the scope of the Committee's authority.

All testimony was taken by means of wire and tape recorders and will be reduced to an official record as soon as it can be transcribed. In addition, all exhibits introduced by witnesses will be annexed and will be part of the official record. In this connection the Committee would like to acknowledge the loyal and untiring work of their two employees, Mrs. Dorris Dietzen and Mrs. Rosanne McCullough. They have worked far in excess of the regular hours and without their help our official record could not be completed.

The Committee has been somewhat handicapped both in conducting the hearings and in the preparation of this report because of the press of the Members regular duties and the fact that the major share of this committee's work was done at times which did not conflict with the meetings of the respective Houses or their standing committees. Because of this it has been impossible for all of the men of both Houses to be present at each meeting. This factor has made difficult the preparation of a comprehensive and complete report. However, all of the information, data and exhibits are now a matter of record and we anticipate and believe that it will be of great benefit to any subsequent Committee, be it an Interim Committee of any kind or a similar Committee of the next Legislature.

FINDINGS

It is our finding that the problem of equalization of property values, both within the individual counties and between the counties, is a grave and serious threat to the entire tax structure of our State and a problem that should be continually studied and remedial measures taken. We are not yet able to state the cure, but only to point out that this problem is one that is not capable of a complete or expedient solution either by this Committee or by this Assembly.

There is no single answer to the whole problem but it is our finding that the biggest source of tax inequality has been a lack of a state-wide uniform classification system. The County Assessor's Association, the County Commissioner's Association, and the State Board of Equalization

were unanimous in their testimony and support of such a bill. It was found that in many of the counties the officials responsible stated they would get their house in order promptly if other counties would do likewise. In some cases we believe that this is used as an excuse—in others it is probably a fact. To correct this situation the several individual members of the Committee recommended the passage of Senate Bill 128, which is the uniform classification law. It is our belief that this bill is the only feasible approach to the classification problem and that it eliminates the bad features of the 1921 Classification Law.

We found that there are some twenty-six (26) counties which have undertaken a reclassification of either their real property or improvements or in two (2) cases all property subject to taxation. We have discussed at great length the various methods and procedures used in this work by the county officials. It is our belief this material gathered from the counties which have conducted such reclassifications or reappraisals should be used extensively in the administration of House Bill 128. While we have not examined all of the counties so concerned, we feel that the job done in Fergus County deserves particular commendation and we would urge that the knowledge gained in that county be used by the other counties.

The second contributing cause of the tax equalization problem has been and is the disparity between counties and the valuation or assessment of both real and personal property. Facts and figures on this situation were presented to this Assembly by the Governor in his message and by the State Board of Equalization. It is our opinion that in some instances relatively low assessments are tied in with the lack of a proper classification. In other cases, special problems exist within the counties that justify the apparent inequality.

However, in the majority of such cases the fault lies with the county officials responsible under law. One of the contributing factors apparently is the lack of sufficient deputies and the low compensation paid the present assessing authorities. In many cases, the County Assessor is just not doing the job. There are examples of low assessments on one or more classes of property and large amounts of "escape" property.

Further it is our finding that in many such cases the County Commissioners are admittedly derelict in the performance of their legal duties in the assessment field. It is our opinion that pursuant to the Constitution and the Statutes applicable, that the Commissioners should and must be more active in the performance of these duties.

The problem of low assessment and the valuation is of great importance to the over-all tax structure because of the operation of the School and Public Welfare Equalization Laws. The counties which are not doing the job receive a disproportionate share of these funds which results in a penalty to the counties which are correctly and legally assessed. It was our feeling that some method was needed to gauge the taxing performance of the various counties. To that end some members of this Committee supported the so-called Variable Ratio Bills. It is further our considered opinion that a continuation of this situation can only lead to a breakdown of these equalization programs. In this connection we feel that there should be close study of the proposal that the State ultimately remove itself from the property tax field.

Our Committee heard a great deal of testimony from members and employees of the State Board of Equalization. We have attempted to review with them their procedures both in the performance of their assessing duties and in the performance of their supervisory duties. However, there has been much discussion of the power of the Board granted to it by the Constitution and Statutes. We feel that this subject is a distinctly legal question and not a matter for our Committee.

It is our finding that there has been for many years past an apparent lack of diligence on the part of the State Board in the performance of some of their assessing duties. There appears that there has been favoritism and under-assessment in many cases. Because this is a very complex technical field your Committee could not fully investigate this problem in the time allotted. We find that at the present time a real attempt is being made to correct these inequalities, but we feel that this situation requires the closest attention.

It is our belief that assessment and valuation should remain at the local level where conditions and values are well known, and where the obligation to secure a just and adequate assessment valuation is properly located. We do believe that the State Board in the exercise of its supervisory powers should work, whenever possible, in cooperation with the individual county officers particularly with the County Assessor's and County Commissioner's Associations. This will have to be done in the administration of Senate Bill 128 and we recommend it in other cases where applicable.

Under the motions of both the House and Senate, your Committee felt that they should briefly consider the bills prepared by the State Board. Accordingly, the first four meetings were conducted with members and employees of the Board considering the measures to be introduced. The knowledge gained from these meetings aided in providing for an intelligent consideration of the measures when they reached the Assembly. We feel that some of the measures such as the Corporation License Tax Revision which failed to pass should have continued study and serious consideration at the next meeting of the Assembly. The present Corporation License Tax Law has had nothing but minor revision since 1917. It is our opinion that the passage of the Withholding Tax Bill, the revision of the personal income tax law, the bills imposing an ad valorem tax on Scheduled Airlines and Scheduled Bus and Truck Lines, in addition to the Classification Bill, before mentioned, is a step in the direction of a sounder tax structure.

We are in agreement also with the plans of the State Board to modernize the Income Tax Department and feel that it is a thing long overdue.

Finally it is our finding that your Committee has not been able in the short time allotted to do the type of job that all of us would desire. The field is immense, it requires special knowledge and it is an unfortunate fact that we are just now at the point where we feel that our activities might result in constructive benefit to the State. We feel that the entire problem is one of the greatest seriousness because the tax structure is the basis of all governmental activity. Because of the gravity of the problem, we find and recommend strongly an Interim Committee limited to the tax field. It was the Committee's belief that such a plan could be set up by this Assembly. If not, we urge that it be two years from now. There are many fields which we did not and could not review thoroughly and which need consideration. Without such a study there can only be a continuation of patch work additions and subtractions to the tax laws with no overall correction. The problem has been too long neglected and it should not be postponed any longer.

We feel that the official record as compiled by your Committee be made available to the Governor and to any Interim Committee which might be created to deal with this problem.

Sirs:

I am returning H. B. No. 18 without my approval for the following reasons:

It would open up to numerous tort claim law suits every field of state governmental activity. It would practically do away with the sovereign rights of the state government in this field. It would result in increased work for our courts and, in my opinion, a greatly increased cost of government without any corresponding increase in service to the taxpayers.

For these reasons, I am returning H.B. No. 18 without my approval.

Yours sincerely,

J. HUGO ARONSON,
Governor.
